Reprogramming from 10 and 21 to 36 Nov 9 2016.pdf
IA EPA No Cost Extension.pdf

CJ,

This Funds-In project ends 2/28/17. However, we have had a breakdown in a major piece of equipment require to analyze their samples. The fix requires a computer which needs to be approved (FITARA?). These approvals, and the purchase itself, is apparently stalled by the transition. I am positive we'll need an extension but no additional funds.

What is the course you recommend? Another No Cost Extension?

Thanks,

Brian
